EDUCATION

VIT-AP University <i>B.Tech in Computer Science and Engineering — CGPA: 9.09/10</i>	2024 – 2028 <i>Amaravati, India</i>
Sri Chaitanya Techno School <i>CBSE Class XII — 87%</i>	2024 <i>India</i>
Delhi Public School <i>CBSE Class X — 88%</i>	2022 <i>India</i>

TECHNICAL SKILLS

Languages: Java, Python, C++, C, TypeScript, SQL
Frontend: React.js, Next.js, HTML, CSS, Tailwind CSS
Backend: Spring Boot, Node.js, Express.js
Databases: PostgreSQL, MySQL, Redis
Tools & Platforms: Git, GitHub, Docker, Maven, Postman, VS Code, Arduino
Core Concepts: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, REST APIs, System Design, Concurrency, Distributed Systems

PROJECTS

SmartURL – Distributed URL Shortener <i>Java 21, Spring Boot, PostgreSQL, Redis, Docker, React</i>	2026
- Designed and developed a distributed URL shortening platform using Java 21, Spring Boot, PostgreSQL, Redis, Docker, and React. - Implemented JWT authentication, Redis read-through caching, custom aliases, URL expiration, QR code generation, and API rate limiting to improve security and scalability. - Built an event-driven analytics pipeline using asynchronous processing to decouple redirect operations from click tracking. - Reduced redirect latency through Redis caching and exposed real-time system metrics using Spring Boot Actuator and Micrometer. - Containerized the application using Docker Compose and documented REST APIs using Swagger/OpenAPI.	
AI Interview Simulator <i>Next.js, React, TypeScript, Node.js, Express.js, LLM API</i>	2026
- Developing a full-stack AI-powered interview platform that simulates technical, HR, and behavioral interviews. - Building a responsive frontend using Next.js, React, and TypeScript with real-time interview session management. - Integrating LLM-based evaluation to generate context-aware interview questions and personalized feedback. - Designing analytics dashboards for interview performance tracking and candidate improvement insights.	
AttendAI – AI-Based Smart Attendance System <i>React.js, Node.js, Python, MySQL</i>	Mar 2026
- Developed a full-stack attendance platform using webcam-based face recognition for automated attendance tracking. - Built role-based workflows for student management, scanning sessions, and attendance automation. - Implemented analytics dashboards for attendance monitoring and participation insights.	
Secure File Sharing System <i>Java, AES Encryption, SHA-256</i>	Jan 2026
- Implemented secure file upload and download using AES encryption and SHA-256 hashing. - Designed role-based access control and file ownership management using core Java and OOP principles. - Focused on data confidentiality, integrity, and secure file transfer mechanisms.	

ACHIEVEMENTS

- Maintained a CGPA of 9.09/10 in Computer Science Engineering coursework at VIT-AP University.
- Actively participated in coding contests, hackathons, and technical events.
- Built and delivered multiple full-stack, AI, and distributed systems projects.
